PROFESSIONAL SUMMARY

Computer Science undergraduate (graduating June 2026) and Full Stack Developer with hands-on experience building and deploying production-style web applications using React, Node.js, Java, and SQL. Shipped two full-stack projects from design through deployment, including a farmer-to-consumer e-commerce marketplace (100+ beta testers, 4.2/5 rating) and a real-time social networking platform supporting 1,000+ concurrent users. Skilled in REST API design, database query optimization (improved response times by up to 75%), and writing clean, maintainable code with Git-based workflows. Currently applying AI/GenAI integration skills through hands-on internships at KodNest and Mindmatrix. Seeking a Full Stack or Backend Developer / Software Engineer internship or entry-level role where I can contribute to real products and grow under experienced engineers.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript

Frontend: React.js, HTML5, CSS3, TypeScript

Backend: Node.js, Express.js, REST API Design, JSP, Servlets

Databases: MySQL, SQLite, MongoDB

Cloud / Deployment: Vercel

AI / GenAI: Generative AI APIs (OpenAI, Gemini), AI Model Integration

Testing Tools: Postman (API Testing)

Version Control: Git, GitHub

IDEs / Editors: VS Code, Cursor, Trae, Windsurf, Antigravity

Core CS Concepts: Data Structures & Algorithms, Database Optimization, Authentication (JWT)

EXPERIENCE

KodNest — Java Full Stack Developer (AI-Enhanced)

Feb 2026 – Present

Bengaluru, India

- Developed full-stack Java applications enhanced with AI capabilities, focusing on backend optimization and intelligent feature development using machine learning integrations.
- Built RESTful APIs serving 1,000+ feature requests with reliable, production-grade performance.
- Optimized database queries, reducing average API response time by 30% through indexing and query refinement.
- Integrated AI models for intelligent data processing and predictive features within Java applications.
- Implemented core Java design patterns and best practices aligned with production-environment standards.

Mindmatrix — Android Developer (GenAI Integration)

Feb 2026 – May 2026

Bengaluru, India

- Developed Android applications leveraging Generative AI capabilities to deliver intelligent, user-centric mobile features.
- Integrated GenAI APIs to power intelligent mobile features within production-track applications.
- Collaborated with cross-functional teams to design and implement scalable backend systems supporting mobile clients.
- Gained hands-on experience in rapid AI integration workflows and mobile performance optimization techniques.

TRAINING PROGRAMS

- **FlyRank AI** — AI Engineer Trainee (Cohort Program), Jun 2026 – Present | Bengaluru
- **HiDevs** — GenAI Developer Trainee (Cohort Program), Jun 2026 – Present | Bengaluru

PROJECTS

Agri-Connect — Agricultural E-Commerce Marketplace

Oct 2025 – Jan 2026

React.js, TypeScript, Node.js, Express.js, SQLite, JWT Authentication, RESTful APIs | github.com/Sreddy08840/agri-connect

- Designed and built a full-stack e-commerce platform connecting farmers directly with consumers, eliminating middlemen in the agricultural supply chain.
- Designed and deployed a responsive UI using React.js and TypeScript for a seamless cross-device user experience.
- Built and secured REST APIs using Node.js and Express.js, implementing JWT-based authentication and end-to-end order management.
- Implemented a SQLite database layer with optimized SQL queries for product, user, and order data.
- Reduced average API response time from 800ms to 200ms (75% improvement) through targeted query optimization.
- Onboarded 100+ beta testers, achieving a 4.2/5 average user feedback rating; implemented secure payment and order-tracking features.

Social Networking Platform — Real-Time Java Web App

Dec 2025 – Jan 2026

Java, JSP, Servlets, MySQL, JDBC, Apache Tomcat, SQL Optimization | github.com/Sreddy08840/social-network-site

- Developed a social networking platform with real-time features using Java, JSP, and MySQL, deepening expertise in backend systems and database design.
- Built a full-featured backend supporting user authentication, profiles, posts, and comments.
- Implemented a real-time like/comment notification system to drive user engagement.
- Designed a normalized database schema capable of handling 1,000+ concurrent users.
- Achieved 95% query optimization through strategic indexing and query analysis, and deployed the application on an Apache Tomcat server with production-style architecture.

EDUCATION

Bangalore Technological Institute

Dec 2022 – May 2026

Bachelor of Engineering (B.E.), Computer Science | Bengaluru, India

NPTEL

Jul 2024 – Oct 2024

Associate Certification, Data Structures & Algorithms

St. Paul's PU College, Bidar

Jul 2020 – Oct 2022

Pre-University Course (PCMB) — Science Stream

CERTIFICATIONS

- Data Structures & Algorithms — NPTEL
- Front-End Development Libraries — freeCodeCamp

ACHIEVEMENTS

- Finalist, HackBLR Hackathon — recognized for building a working full-stack solution under time-constrained, competitive conditions.
