

SANTOSH

AI Engineer | Full Stack Developer | Generative AI Specialist
sreddy08840@gmail.com | +91 8618808929 | Bengaluru, India | github.com/Sreddy08840

PROFESSIONAL SUMMARY

Results-driven AI Engineer and Full Stack Developer with proven expertise in building intelligent, scalable applications using Python, React.js, Node.js, Express.js, and Flask. Hands-on experience developing AI-powered voice assistants, NLP systems, and Generative AI solutions leveraging OpenAI APIs and advanced Prompt Engineering techniques. Strong foundation in Machine Learning, Deep Learning, RESTful API development, and database management. Demonstrated ability to architect end-to-end solutions across healthcare and agriculture domains, delivering measurable business impact through rapid prototyping and collaborative problem-solving. Passionate about applying cutting-edge AI and modern web technologies to solve real-world challenges.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript (ES6+), TypeScript, Java, HTML5, CSS3
Frontend Technologies:	React.js, Responsive Web Design, Component-Based Architecture, UI/UX Development
Backend Technologies:	Node.js, Express.js, Flask, RESTful API Development, Microservices
AI / ML Technologies:	Machine Learning, Deep Learning, NLP, Generative AI, Prompt Engineering, Speech Recognition, LLM Integration
Databases:	MySQL, SQLite, Database Design & Management
Cloud & DevOps:	Git, GitHub, Version Control, CI/CD Fundamentals
Tools & Platforms:	OpenAI API, Postman, API Testing, Agile / SDLC
Core Competencies:	System Design, Problem Solving, Debugging, Scalable Architecture, Code Review

PROJECTS

VoiceCare-AI — Healthcare Voice Assistant | *Python · NLP · Speech Recognition · OpenAI API · Flask*

- Architected an AI-powered healthcare voice assistant enabling real-time patient interaction and intelligent medical support through conversational AI.
- Engineered speech-to-text pipeline integrating advanced NLP techniques, achieving seamless natural language understanding for healthcare queries.
- Integrated OpenAI API for intelligent response generation, enabling context-aware, domain-specific medical conversations.
- Designed scalable backend workflows with Flask, improving system reliability and reducing response latency for concurrent users.

Kirishi Voice AI — Agricultural AI Assistant | *Python · NLP · REST APIs · Multilingual Processing*

- Developed a multilingual AI voice assistant providing real-time crop guidance and agricultural advisory to farmers across multiple regional languages.
- Applied advanced NLP techniques to parse farmer queries and generate domain-specific intelligent recommendations with high accuracy.
- Built scalable RESTful APIs to handle concurrent agricultural information requests, ensuring high availability and low latency.
- Enhanced accessibility through conversational AI automation, expanding platform reach to low-literacy farming communities.

Corporate Commitment Monitor — AI Analytics Platform | *Python · Machine Learning · Data Analytics · Predictive Modeling*

- Developed an AI-driven analytics platform for automated monitoring of corporate commitments and key operational performance metrics.
- Designed ML-powered predictive analysis workflows, enabling proactive identification of commitment deviations and risk indicators.

- Processed and transformed structured datasets to generate actionable business intelligence reports for executive stakeholders.

Agri-Connect — AI-Powered Full Stack Marketplace | *React.js · Node.js · Express.js · SQLite · REST APIs*

- Built a production-ready full-stack marketplace platform connecting 500+ farmers directly with end consumers, eliminating middlemen.
- Developed RESTful APIs, JWT-based authentication, product listing modules, and end-to-end order management system using Node.js and Express.js.
- Architected reusable React.js component library and scalable backend microservices, reducing development time by 30%.
- Integrated AI-powered product recommendation engine, increasing user engagement and session duration on the platform.

EDUCATION

Bachelor of Engineering — Computer Science | Bangalore Technological Institute

Dec 2022 – Jun 2026

CGPA: 7.95 / 10

CERTIFICATIONS

- Data Structures and Algorithms in Java — NPTEL
- Programming in Java — NPTEL (IIT Kanpur)
- Front End Development Libraries — freeCodeCamp

ACHIEVEMENTS & RECOGNITION

- Finalist in multiple national-level hackathons, competing against 500+ teams with AI-powered solutions in healthcare and agriculture domains.
- Independently designed and deployed end-to-end AI applications in production-level environments, covering NLP, speech recognition, and Generative AI.
- Recognized for rapid prototyping capability, delivering functional AI prototypes within 48-hour hackathon sprints.
- Successfully built 4+ full-stack and AI projects integrating modern technologies including React.js, Node.js, Python, and OpenAI APIs.
